Soft skills:

Conflict management, Collaboration

ACHIEVEMENTS

- Solved 300+ DSA problems on Leetcode and GFG
- Styled 250+ designs in CSS Battle

EDUCATION

Knowledge Institute of Technology

BE – Computer Science and Engineering

Student Achiever Awardee (2023&24)

April 2024 | CGPA – 8.276/10

COURSEWORK

- Programming in JavaScript ([Meta](#))
- Full Stack Development ([Infosys](#))
- Front-End Web Development Learning Path ([LinkedIn](#))
- Java Development ([LinkedIn](#))
- Agile Methodology ([LinkedIn](#))
- Object Oriented Programming
- Data Structure and Algorithms

INTERESTS

Reading • Public Speaking • Editing

EXPERIENCE

Open Weaver | Web Developer Intern | OCT 2023 – NOV 2023

- Worked in the development of **Cool Tech Gear Zone**, creating a **user-centric platform** with potential to boost gadget sales by **30-40%**.
- **Led and coordinated** a team of 4 fellow interns ensuring collaborative and effective execution of the **industry-ready** project.

IBM Skills Build | Full Stack Dev Intern | SEP 2022 – OCT 2022

- Developed a **MERN stack** web application, ensuring a visually appealing UI and incorporating additional features beyond the basic requirements.
- Achieved **95%** adherence to **project timelines**, receiving **positive feedback** from technical team and integrating suggestions into the development process.

PROJECTS

Health Link | React.js, Node.js, MongoDB, Cloudinary, Stripe | [\[Demo\]](#) [\[GitHub\]](#)

- Developed a web app for patients to find the right doctor based on their **specific health issues** and **locality**.
- Streamlined the entire appointment booking, ensuring **100%** **secure** data access and storage using **MERN stack** with **Stripe** for payment.
- Ensured a **role-based authorization**, user approval and **mobile-responsive design**.
- Enabled **profile management** for all users to update personal information, and availability schedules.

Food n Fun | React.js, Node.js, MongoDB, JWT, PayPal | [\[Live\]](#) [\[GitHub\]](#)

- Developed an E2E web application for a restaurant and its consumers to order the food.
- Utilized **MERN stack** for development, incorporating **Bcrypt** for secure data storage, **PayPal** for payments and **Google Maps** for location tracking.
- Added **search** and **filter** feature with name and category.
- Created a user interface that is **easily accessible** while achieving a notable **25% reduction in code**.

Kabi Shopping | JavaScript, HTML, CSS | [\[Live\]](#) [\[GitHub\]](#)

- Designed an **e-commerce** website exclusive for clothing, prioritizing an enriched user experience.
- Reduced code base by **30%** through optimal CSS usage, resulting in **lightweight** and **100% responsive design**.
